

Der Innenfilter BioCompact – effektiv auf kleinstem Raum

The BioCompact internal filter is ideal for nano aquariums from 25 to 50 l with minimal animal stock and for paludariums. It can be installed vertically as well as horizontally and the water flow rate can be individually adjusted. All in all, the complete filter, which is immediately ready for operation, ensuring effective water filtration in the smallest space.

OASE BioCompact internal filters

OASE BioCompact 25	RRP	€17.99
OASE BioCompact 50	RRP	€19.99

Ideal for small aquariums – 25 or 50 litres: The BioCompact series of internal filters from OASE. Photo: OASE GmbH

The BioPlus corner internal series – where rigorous requirements are imposed on filter capacity and convenience:

The corner internal filter with integrated diffuser nozzles is suitable for medium-sized aquariums with higher filter capacity requirements from 100 to 300 litres. It ensures uniform surface movement and prevents formation of biofilm. The effectively concealed diffuser nozzles ensure oxygen enrichment, which is so important. In addition it is quite inconspicuous and easy to clean: The compact filter unit is simply taken out – the pump unit on the other hand remains in place. The BioPlus series is available with or without the adjustable heater option. (OASE)
