

## **OASE HighLine aquariums - pure design with no compromises**

New directions in indoor aquatics – this means modern contemporary aquarium design without visible technology, absolute minimal cleaning effort and practical features that make living with an aquarium entirely uncomplicated. Indoor aquatics from and with OASE means unrestricted satisfaction with the underwater world, right from the start: The aquariums not only fit optimally in every modern living landscape, without obtrusive, conspicuous cables and hoses, in addition, combined with the new OASE filter technology, they require only minimal maintenance. The filter technology is located in the base cabinet where it is effectively concealed and easily accessible: Thanks to the clever, configurable storage possibilities in the cabinet, disturbing accessories simply disappear into the base cabinet. Modern LED lighting ensures the right light atmosphere in the aquarium, beautifully stages the animals and ensures healthy plant growth. And the economical LED technology works with particularly high energy efficiency. The HighLine aquariums are available in tank sizes 200, 300 and 400 litre and in the decors high-gloss white, high-gloss anthracite and natural oak starting in September 2016. (OASE)
