

## **biOrb HALO: Infinite water satisfaction without a visible water level**

The biOrb HALO acrylic aquarium has an unseen water level, the cover conceals the water line – for an unrivalled, limitless underwater world. Moreover, the cover offers fast and easy access to the interior of the aquarium and makes feeding of the aquarium inhabitants uncomplicated and clean. With the biOrb HALO technology and connections are well concealed and virtually invisible. The complete set consists of an aquarium of highly-resistant, transparent acrylic, LED lighting, air stone, air pump, ceramic substrate, as well as an efficient filter system. The perfectly matched biological, chemical and mechanical water cleaning ensures a stable balance of the aquarium water and makes cleaning and care particularly easy. In colour variants grey and white, and in tank sizes of 15, 30, and 60 litres, the modern biOrb HALO fits with any style of furnishing – the modern formal language is in line with the sophisticated design of the biOrb family of aquariums. The biOrb HALO 15 with the remote controlled, programmable MCR lighting ensures a brilliant play of colours in the aquarium; the biOrb HALO 30 litre variants are available with standard LED as well as Moonlight: For the Moonlight variant a sensor automatically detects day and night and adapts the lighting accordingly. The biOrb HALO 60 is also available as Moonlight variant. (OASE)
