

biOrb TUBE: Complete transparency without disturbing edges

The biOrb TUBE Acrylic Aquarium is a particularity: It entirely dispenses with edges or disturbing strips – for a completely unobstructed view of the underwater world. Available in tank sizes 15, 30 and 35 litres, each with a black or white base, the biOrb Tube is a complete set that includes the appropriate lighting – either as standard LED or as a remote controlled MCR-RGB light that ensures individual colourful illumination of the designer object. The effectively concealed filter system with ceramic substrate, together with the air stone ensures constant, outstanding water conditions; the perfectly matched biological, chemical and mechanical water cleaning ensures a stable balance of the aquarium water and makes cleaning and care particularly easy.
