

biOrb Decoration: Ornaments, stones and plants for individual design

It is the individual decoration of an aquarium that really makes a biOrb aquarium a unique underwater world. The extensive assortment of sculptures, stones and artificial plants enables a variety of design possibilities. Coral reef, shells, moorwood, ornaments, but also stone formations and slate sculptures are the design basis in every biOrb. The ornaments are placed in the centre around the air column. Ceramic filter media serve as the basis on the aquarium bed. All around there are no limits imposed on fantasy; the extensive assortment, artificial plants that position themselves vertically straight, offers many design possibilities – from naturally simple to unusually colourful (OASE)
