

## **Aquarius Eco Expert 22000 / 28000**

Network-capable, energy-efficient powerhouses for large installations

With the new Aquarius Eco Expert 22000 and 28000 fountain pumps OASE is offering two high-performance powerhouses that are primarily suited for larger fountain installations. And in spite of the strong performance they work with high energy efficiency: The power houses offer energy savings of up to 30% as compared with the predecessor model with a water column up to ten meters, and in addition to the popular Vulkan and Schaumsprudler nozzles they can also be combined with the new Cluster Eco nozzle. In terms of dynamics the pump leaves nothing to be desired: 8 different programs enable individual adjustment for attractive water patterns. Thanks to the patented frost protection to -20°C the Aquarius Eco Expert is also effectively protected even in the cold season. (OASE)

### OASE Aquarius Eco Expert

OASE Aquarius Eco Expert 22000 (item 42405)	RRP	€1099.99
OASE Aquarius Eco Expert 28000 (item 42404)	RRP	€1299.99

## **Eco Control**

Control device for products that are compatible with Easy Garden Control.

The Innovative controller for AquaMax Eco Expert pumps is used for smart regulation and control. With the illuminated, two-line display for easy read-out, power consumption, speed and total runtime of the connected pumps can be easily controlled and dimmed via the controller or the SFC or dynamic status can be changed. The spray-water proof all-round talent is designed for all-season use in the garden. Eco Control does not need a separate power supply – and thus ensures independence on the pond – also thanks to the 10 meter EGC cable for bi-directional communication.
