

ProfiClear Premium Compact EGC

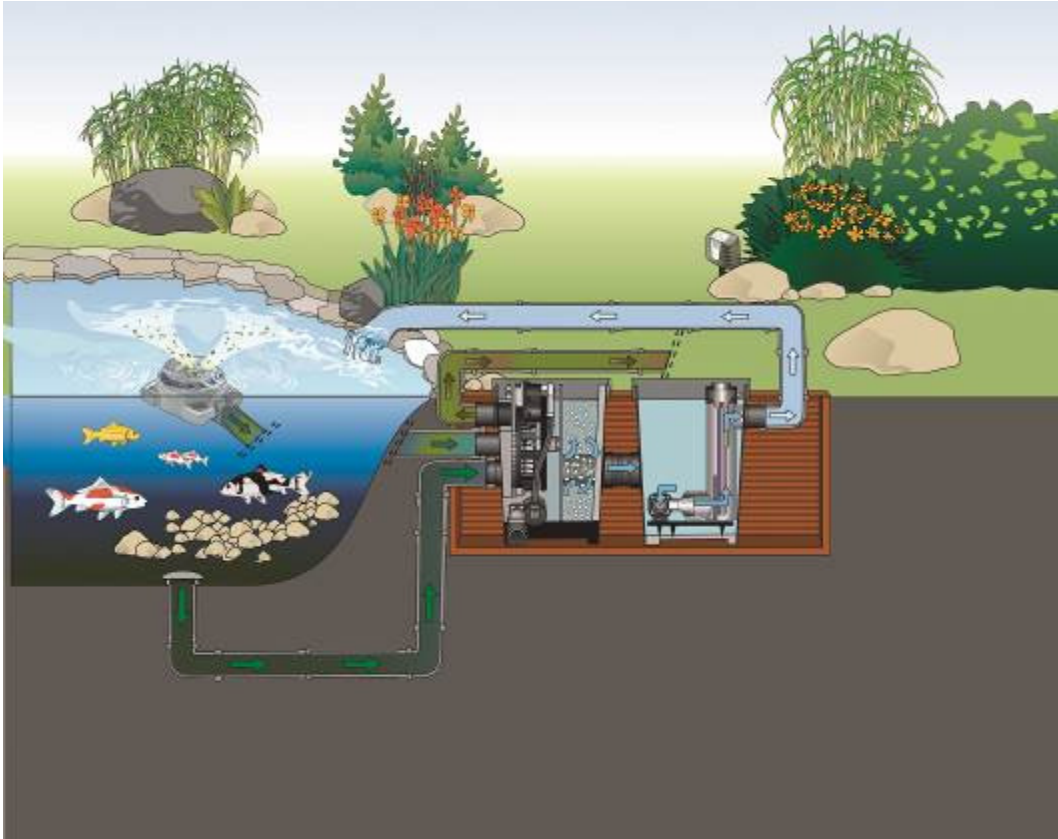

The compact and powerful alternative for smaller ponds up to 80m³

The professional compact drum filter is reasonably priced alternative for smaller pond and Koi pond up to 80 m³ without having to compromise on useful functions such as a high separation performance in the pump-fed as well as in the gravity-fed principle, minimal space requirements and an effective integration, the Moving-Bed-System with Hel-X 13 filter media with a significantly enlarged surface for effective decomposition. From January 2017, the **ProfiClear Premium Compact** will be available EGC-suitable for both gravitational and pump-fed systems. By this, the compact drum filter now also joins the new Easy Garden Control family which means an easy control of the system by App via Tablet or Smartphone within the home network. During 2017 season, a free of charge update will follow which enables all EGC-products to be controlled via the new OASE Cloud. Besides the new possibilities to control the filter, it will be possible to make in-depth analysis on flush water, temperature curves or to receive mobile information in case of any technical or performance problems. The new safety plus: The gravity-fed systems will include an additional sensor to identify the drop out of non-EGC pumps.
