What is the downloadportal?

The OASE downloadportal offers you a large number of options.

After the online registration you can download texts, pictures, videos, technical information, data sheets and a lot more.

On the following pages of this documentation you're going to learn the basic structures of our download portal.

When opening the OASE online portal you're going to see the following image:

The screenshot shows the OASE Download-Portal interface. At the top is a banner with the Oase logo and a pink lotus flower. Below the banner is a navigation bar with links: Welcome, Downloadportal, FAQ, and Impressum. A breadcrumb trail shows 'oase-livingwater.com > Welcome'. The main heading is 'Welcome to the OASE Download-Portal'. Below this, a paragraph states: 'In the password secured OASE Download-Portal we provide for our OASE partners and journalists numerous photos, text'. A bulleted list follows: product pictures, pictures of implementations, amthomasphere pictures of gardens, ponds, watercourses, fountains, etc., product texts • technical details, and so on. Instructions for login and registration are provided. The login form includes an 'Email Address' field with the text 'downloadportal@oase-liv', a 'Password' field, a 'Remember Me' checkbox, and a 'Sign In' button. At the bottom, there are links for 'Create Account' and 'Forgot Password'. Red arrows and text boxes provide annotations: one points to the email field with the text 'Log in with your username'; another points to the 'Sign In' button with the text 'Here you're able to create a user account'; and a third points to the 'Forgot Password' link with the text 'You forgot your password? Click here'.

3. Step: Download

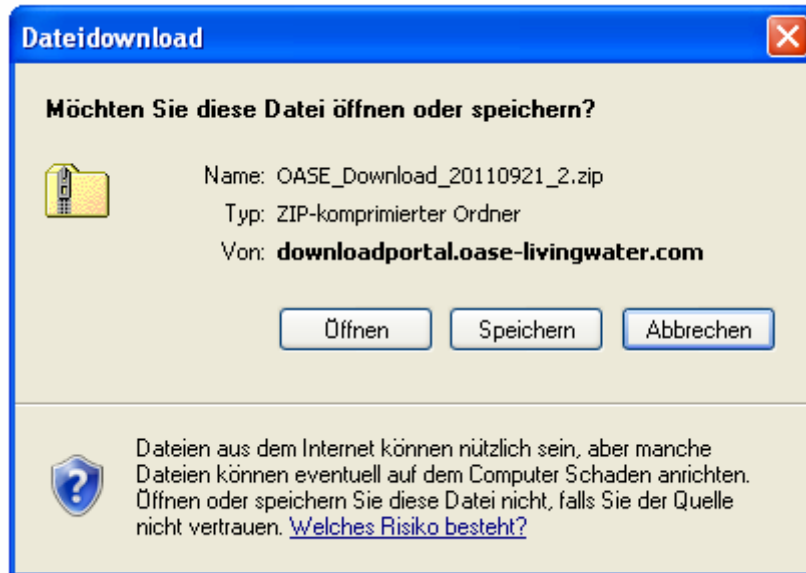

See example „AquaMax“-line

- ☐ Download as detail list (space-saving - every file exists just one time in the Zip-file)
- ☐ Maintain the duplicates

<u>Download 1</u> Image data as layout - 72 dpi (no print quality; e.g. for the internet) Filesize: 1006 kB	<u>Download 2</u> Image data as HRes - 300 dpi (print quality) Filesize: 48 MB
--	---

You can choose between download 1 and download Download 1 provides you smaller pictures that are qualified to be used in the internet. These pictures don't have print quality. Download 2 provides you pictures with a higher resolution and in print quality.

After clicking Download 1 or Download 2, the following window will appear:

Now you can decide if you want to open the ZIP-file directly or if you want to save it to your local hard drive.

The ZIP file format is a format that contains comprimized data. To open these files you have to use a program like „WinZip“. Since Windows XP there is an integrated ZIP-function, so you don't need another extra program like for example „WinZip“ to unzip the files.

If the downloaded files are too big you will receive a mail that includes a link from where you can access the data.

=> The marked files are now readily available in a ZIP-folder.

You can choose a popular product group and then select the related files that you wish to download.
Here for example we're choosing the product picture of the „AquaMax“-line.

- ☒ Download as detail list
- ☒ Remove the duplicates (space-saving - every file exists just one time in the Zip-file)

Download 1

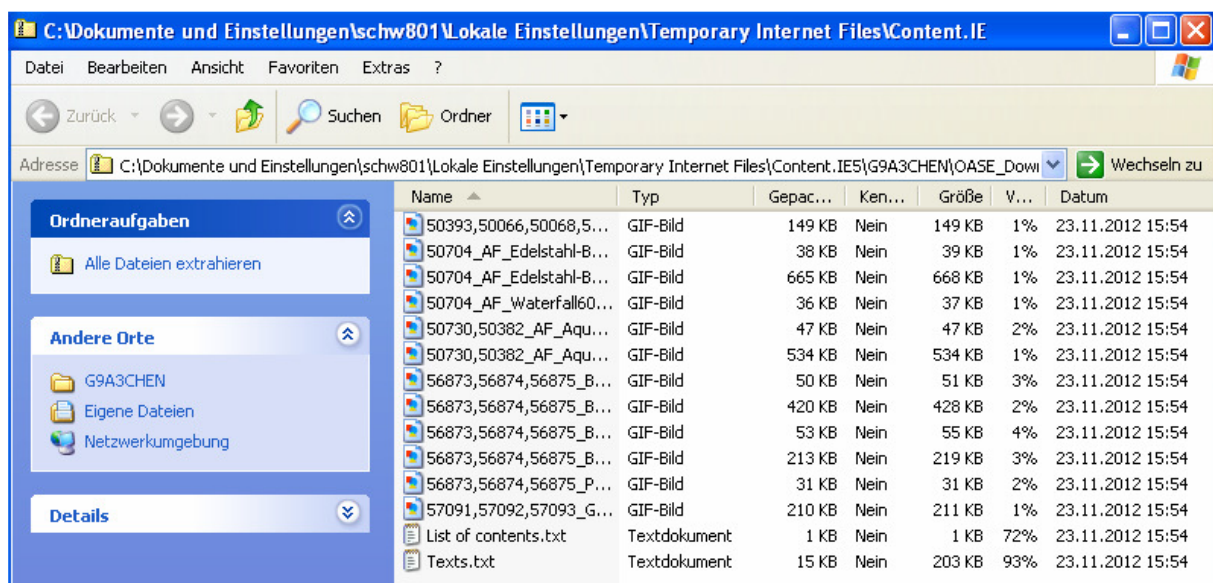

Image data as layout - 72 dpi
(no print quality; e.g. for the internet)
Filesize: 1 MB

Download 2

Image data as HiRes - 300 dpi
(print quality)
Filesize: 103 MB

Tip: The file is too large for a direct download. If you select this file you get a download-link via email.

With putting check marks you avoid doubled downloads. The pictures are all in one folder. In each folder there is only one version of a specific file. Because of that you will save a lot of capacity

- ☐ Download as detail list
☐ Remove the duplicates (space-saving - every file exists just one time in the Zip-file)

Download 1
