Inflow nozzle 15 E													

INFLOW NOZZLE 15 E

For undisturbed satisfaction in clean fountain pools and ponds.

Filtered water is fed back into the pool through stainless steel and bronze inflow nozzles. Direction of flow can be changed by adjusting the nozzle.

Fresh water inlet armatures are used to fill the pool and for top-up feed of evaporated water from the public drinking water network. The water-level can be adjusted from 100 to 1000 mm.

FLOOR/WALL TRANSITIONS

Trouble-free pipe routing through pool walls or pool floors is indispensable.

OASE floor/wall transitions are made of high-grade stainless steel and have a large-surface concrete-tight flange with grounding possibility.

Models with liner clamping flange are available for pools with liner.

Product characteristics at a glance

- Versatile implementation
- Easy to install
- Extremely corrosion resistant
