

A festival of light and music

With water driven up to 80 meters high and a total of more than 3000 illuminating bodies providing 1.330.000 lumen, the spectacular Sheik Jaber Al Ahmad Cultural Center Musical Fountain in Kuwait City has become both landmark and tourist attraction.

This spectacular musical fountain, designed and realized by Watercube srl, is a choreographed water feature and set into a 4800 square meters lake. There are different types of nozzles: rotating jets up to 20 meters, air driven nozzles up to 25, 50 and 80 meters as well as special nozzles that mix water and fire. Combining music, light, water and fire the spectacular musical water show is visible from every point of the lake promenade and neighboring structures.

Three circles of air driven nozzles rise up to 80 meters high.

The show is completed by fog nozzles and three water screen for laser projections.

The water feature is equipped with more than 3000 illuminating bodies providing 1.330.000 lumen.

The Musical fountain in numbers:

- 1.300 m stainless steel pipes
- 2.000 m pvc PN 16 pipes
- 279 air driven nozzles
- 120 multidirectional nozzles
- 25 water flame nozzles
- 1.120 fog nozzles
- 3 water screen nozzles
- 4 laser
- 1 screen projector
- 147.000 lt/1' compressed air
- 72.000 m electrical cable
- 3 MW installed power
